# CREATE A PARADISE FOR FLOWERS

Are you focused on delivering the highest quality beauty? Your flower arrangements are unique, but when set cramped on shelves they become invisible and wither quickly?

We have a device for you that will extend their life and help showcase your floristic works of art.

The flower refrigerator is a solution designed for the professionals. It creates the best climate for flowers, so you can focus your energy on what is most important, your compositions.

## 12 benefits for the florist

You will give the flowers the space they need, because you can put them **in tanks**, or hang ready compositions on the **crossbar**, or display them on adjustable **hanging shelves**.

You can choose the appropriate temperature easily, because we applied an **electronic temperature controller** with clear display.

You will highlight your professionalism, because the device is decorated with **elegant floral pattern**.

You can set it up easily even in the room with uneven floor, because we used **adjustable legs**.

Due to the **panoramic, tempered glass**, you will provide perfect view from all sides.

We used the **gravity cooling**, which does not dry the air. And due to the perfect temperature, you change the water less often.

You will save time because we built in the **automatic condensate evaporation system**, that you don't have to empty.

You will gain durable and **strong construction**, because the device is made of grinded stainless steel, that we can paint for you.

You will easily insert flowers into the device, because we have installed **sliding doors**, which you can block for the time of loading.

You will keep it clean easily, because the **bottom** of the device and the **platforms** are made of high quality **stainless steel** in "canvas" texture. For your comfort, platforms are available in 3 different heights.

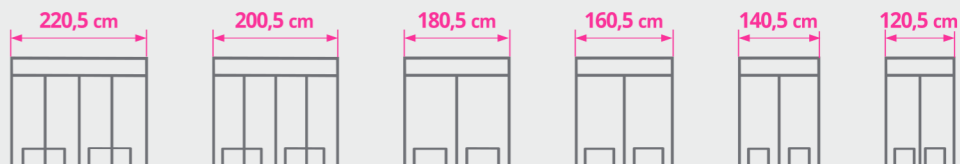

You will take care of the environment, because the interior of the device is cooled with **R-290 refrigerant**.

You will show all the colours in your compositions, due to **energy-saving LED lighting**.

## Size for every interior

You will gain extra space, because we have prepared a refrigerator in as many as **6 different sizes**

# UP TO 6 TIMES LONGER LASTING FRESHNESS OF FLOWERS, which we confirmed in durability test

We have checked. We have divided 3 species of flowers into 2 groups. The first one we placed in our flower refrigerator, the other we kept at room temperature. Flowers that have been stored in the refrigerator, looked fresh and healthy for up to 18 days after purchase.

day 01

day 08

day 18

In the photos, we showed how the flowers in the flower refrigerator were changing during the test. Their lives were extended up to 6 times compared to flowers kept outside the refrigerator, which after 5 days withered and were unfit for display and sale. Results will vary depending on the species.

The flowers subjected to the experiment were derived from the same suppliers, from one collective package. The water in the tanks was changed regularly and in the same frequencies for each group.

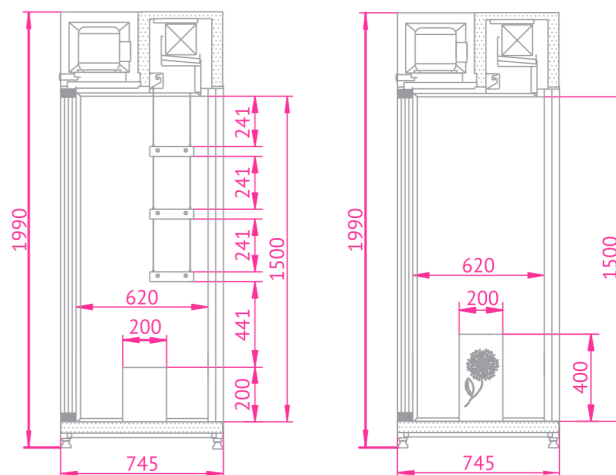

## CHOSEN BY THE CUSTOMERS

Flower refrigerator with a mirror inside

### TECHNICAL DATA

width	120,5; 140,5; 160,5; 180,5; 200,5; 220,5 cm
depth	74,5 cm
height	199 cm
width of the exposition	110; 130; 150; 170; 190; 210 cm
depth of the exposition	62 cm
height of the exposition	150 cm
temperatures range	+1°C ÷ +10°C
refrigerant (HC)	R-290
rated voltage	230 V- / 50 Hz
rated power	620 W ÷ 1050 W
defrosting	automatic
flower stools height	20; 40; 60 cm

The presented spacing of hanged shelves and the height of stools are examples.
